

This homework was not extremely difficult, and I enjoyed the amount of flexibility we were provided for implementing a graph ADT. I felt like I was in a bit of a time crunch with this homework due to other assignments in classes and the usage of a late day, but other than that it took me less than a day to finish. Prior to this homework, I had little experience using hashSets, linked lists, or Treesets in java. While I ended up not using treesets in my implementation, I gained knowledge of all three while deciding how I would go about making this graph ADT.
